

## Why Use PULSE?

PULSE can generate a new revenue stream for your practice. Our service allows physician offices to keep revenue from their tests in-house versus sending it out to the hospitals.

PULSE is an extremely convenient service for your office staff as well as your patients. Patients feel much more comfortable in their own physicians' office and save on average, 2 hours of their time.

PULSE offers a 24-hour guarantee on reports. We have six area Cardiology offices that assist in our service guarantee.

PULSE offers you the choice of which Cardiology office you choose to interpret the tests on your patients.

PULSE can come to your office when you choose. Once a month, twice a month, or once a week. Whatever your patient load, we can structure an agreement to your particular office needs.

PULSE has been structured with local healthcare attorneys to ensure that all Stark and Fraud & Abuse laws are followed.

PULSE offers state of the art digital ultrasound imaging. Our service surpasses image technology currently being used in our area.

PULSE is the first provider of premier diagnostic services that meets physicians needs in a manner consistent with current regulatory requirements.

While physician reimbursement continues to decrease, PULSE can generate an increase to your practice's revenue. You have nothing to lose – and everything to gain.
